

TOSHAO CLEMENT JOSEPH SHARING HIS PHOTOSTORY WITH US

This rip saw we used to use in the past years, one man cannot handle it, it use to be handle by two men, so this need man's power. The axe and cutlass is what we use to cut our farms and other things..

This equipment we use to build houses and school and other building in the 1980's. This take us long time to complete buildings.

In the year 2011 chain saw has been introduce to our village since then we have became modernize and things becomes easier and faster.

Before the grass cutter came in we use to use cutlass and piece of stick to lap down grass around our yard. Since this came in we do a lot more work faster and it has been a very helpful to the village
